PROFESSIONAL SUMMARY

MCA graduate and AI/ML engineer focused on large language model applications, retrieval-augmented generation (RAG), and agentic systems. Contributed to four AI projects during an internship at VSPAN Technology Solutions and builds business software for Spartan Info Solutions. Works across Python, LangChain/LangGraph, vector search, FastAPI/Django, and AWS.

EXPERIENCE

AI/ML Engineer Intern | VSPAN Technology Solutions Private Limited Feb-May 2026
Bengaluru

- Contributed to four AI projects spanning RAG chatbots, NLP pipelines, hospital AI systems, and agentic web applications using LangChain and LangGraph.
- Built RAG pipelines with LangChain, FAISS, ChromaDB, and OpenAI API, covering document ingestion, chunking, embeddings, and similarity search.
- Built agentic workflows with multi-step reasoning, function calling, and tool use to automate complex tasks.
- Developed REST APIs with FastAPI and Django; containerised applications with Docker for deployment.
- Implemented automated PDF reports combining AI recommendations with chatbot-generated insights.

Freelance Developer | Spartan Info Solutions Project-based

- Completed SmartAttend, an employee attendance and HR system with GPS-based tracking, payroll workflows, and HR operations.
- Completed Bulk Rename Pro, a Windows utility for renaming batches of PDF files from Excel mappings, with undo and operation backups.
- Rebuilding the RMS platform using Next.js, Node.js, and Prisma; this project is ongoing.

SELECTED PROJECTS

- Financial RAG Chatbot: answers holdings and trades questions with responses grounded in retrieved documents.
- HK Hospital AI Chatbot: supports patient queries, appointment guidance, and departmental routing.
- VSPAN Chatbot Editor: node-based visual editor for chatbot flows with LLM-generated responses.
- aiscrap: LangGraph web scraper with multi-step reasoning, content extraction, and deduplication.
- NAVIGROW.AI: career platform with ML recommendations, an NLP chatbot, and automated PDF reports; deployed on AWS EC2 with Docker.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, Bash
AI/ML: LangChain, LangGraph, LlamaIndex, OpenAI API, Hugging Face Transformers, RAG, NLP, scikit-learn, text classification, NER, sentiment analysis, LoRA/QLoRA
Retrieval: FAISS, Pinecone, ChromaDB, Weaviate, semantic search, embeddings
Backend & data: FastAPI, Django, Flask, REST APIs, WebSockets, async Python, MySQL, PostgreSQL, SQLite, Redis, NumPy, Pandas
Cloud & tools: AWS (EC2, S3, RDS, IAM, Lambda, API Gateway), Docker, GitHub Actions, Linux, Nginx, Streamlit, Gradio, MLflow, LangSmith

EDUCATION

Master of Computer Applications (MCA) | Presidency College, Hebbal, Bengaluru | 2025
Bachelor of Computer Applications (BCA) | Nagarjuna Degree College, Yelahanka, Bengaluru | 2022
